Profile

Experienced Technical Lead with over 10 years in the technology industry, combining strong technical skills in fullstack development, cloud infrastructure, and AI-driven solutions with proven leadership in high-performing teams. Solid background in backend (Node.js, Fastify), frontend (React), and cloud environments (GCP, Azure DevOps). Led large-scale projects across industries, including enterprise platforms, design systems, and streaming services like Roku. Adept at designing scalable architectures, driving technical excellence, and delivering innovative solutions that meet business needs.

Employment History

Digital Business Integration Consultant, Accenture Brazil, São Paulo

FEBRUARY 2021 – PRESENT

Main Responsibilities:

- Technical leadership for development teams, providing guidance, unblocking tasks, and ensuring delivery quality.
- Manage client and partner communication, propose technical solutions, and oversee applications across Latin America.

Key Projects:

- **RD Saúde – Technical Lead (Current)**
Lead the full technical scope, including architecture design, cloud infrastructure (GCP), CI/CD (Azure DevOps), backend (Node.js, Fastify), and frontend (React). Integrated AI-powered APIs (OpenAI, Gemini) to drive innovation and mentored the development team.
- **DirectvGo – Roku Team**
Led the Roku platform across Latin America, ensuring stability, managing releases, aligning with stakeholders, and supporting multiple development teams.
- **DirectvGo – Roku Development**
Developed and optimized features for the Roku app using BrightScript and SceneGraph, focusing on UI performance and component quality.
- **DirectvGo – Vrio Migration**
Acted as Senior Developer and technical lead, structuring codebases, creating documentation, and integrating RESTful APIs for efficient system communication.

Digital Business Integration Analyst, Accenture Brazil, São Paulo

JANUARY 2018 – JANUARY 2021

Main Responsibilities:

- Frontend development with TypeScript, JavaScript, HTML, CSS, Bootstrap, and Sass.
- Contributed to the creation of a design system to standardize and optimize projects.
- Developed responsive web applications and ensured user-friendly, accessible interfaces.

Key Projects:

- **DirectvGo – Vrio Migration**
Built internal tools, integrated APIs, led the technical direction of the team, and managed tasks using Jira.

- **Sky – Sky Play**

Developed a VOD streaming web application, performed code reviews, and mentored junior developers to ensure high-quality deliverables.

- **Sky – Sky Pré-Pago**

Migrated legacy systems, created a Design System, improved accessibility, and ensured code quality through regular reviews.

- **Monsanto – Web Development**

Developed and maintained web portals using Liferay, created reusable components, and managed CMS environments.

Web Developer, Studio Visual, São Paulo

SEPTEMBER 2015 – DECEMBER 2017

- Development of websites and web applications focused on front-end and back-end using PHP, HTML, CSS, and JavaScript.
- Creation and customization of WordPress themes, from project conception to final delivery.
- Implementation of user-friendly interfaces to facilitate client use and content management on the platform.
- Testing and validation of developed components to ensure quality and functionality.
- Collaboration with a team of developers to integrate components for delivering complete and well-structured projects.
- Progressive experience from junior to mid-level developer, working on diverse projects.

IT Support Technician, Metrobyte, São Paulo

FEBRUARY 2014 – SEPTEMBER 2015

- Technical support for clients, addressing hardware and software issues on computers and servers.
- Maintenance and management of domain systems on Windows platforms, including user creation and permission management.
- Configuration and application of Group Policy Objects (GPO) and resource management for users in corporate environments.
- Repair of workstations and installation/configuration of Windows operating systems.
- Installation and configuration of servers, with experience in Windows Server 2012.

Education

Technologist in System Analysis and Development, Universidade Cidade de São Paulo, São Paulo

JANUARY 2013 – DECEMBER 2014

Eletrronics Technician, ETEC Julio de Mesquita, São Paulo

JANUARY 2011 – DECEMBER 2012
